

Embossing Technical Information

- Can emboss and deboss side by side, but depth will be compromised as to not tear paper
- All matte products will take away the appearance of depth and detail from an emboss
- Do not recommend embossing type smaller than 12pt
- When using a combination of foil stamping and Gritty Matte UV, embossing may cause scuffing of the foil
- Heavier weight stocks show more detail when embossed

Contact your Lehigh Phoenix Sales Executive for further details regarding limitations and proper usage.
