

VibraColor™ Technical Information

- Enhances details and contrast of overall printed piece or can be used to achieve a PMS color not possible with CMYK.
- Recreates CMYK while removing the unwanted colors that appear in CMY combinations and cleans up the black inks.
- Any colors can be used with the VibraColor™ technique.
- Limitations are dependent on the customer's budget in terms of the number of colors that can be used and the customer's input.
- It is important that the customer provides direction as to which is the primary or desired color that they would like enhanced.

Contact your Lehigh Phoenix Sales Executive for further details regarding limitations and proper usage.
